## **TRENCH DRAINS**

#### BG-FILCOTEN trench drains are an efficient solution for surface water capture.

FILCOTEN® channels are made from cement-bonded fiber composites, which react to changes in temperature in the same way as the surrounding concrete bedding. This achieves a continuous integral unit reacting and flexing with the environment delivering a long service life for the entire channel system.

- Non-flammable (Fire rating class A1)
- Free from resins, solvents and other harmful substances
- Freeze and thaw resistant (down to -40°C) (as per ASTM C666)
